## FOR IMMEDIATE RELEASE

### **Century Controls Announces Remote Control Panel Interface** *Now Ability to Monitor and Manage System from your Internet Web Browser*

**ROGERS, Minnesota — May 15, 2009** — Century Controls proudly announces new functionality to make it easier than ever to manage your control solution!

**NEW REMOTE ACCESS AND CONTROL FEATURE!** - Available on systems with either the 8-inch color or 6-inch grayscale touch-screen display.

#### **New functionality includes:**

##### **Web browser based**

- Users can access and control the panel remotely without purchasing or downloading additional software packages.
- Simply configure the network settings in the panel project and connect the panel to a network.
- Supports Windows XP and Vista operating systems

##### **Authorized users have the ability to remotely**

- Monitor and control screen operations of the panel as if touching the panel itself
- Test and troubleshoot the control systems
- View, zoom, print and save screen captures of active screens

##### **Multilevel Logon Security**

Three Remote Access user accounts can be configured and stored in the panel project. Each account allows up to five remote users to be connected simultaneously.

##### **Multilevel Access Control**

Each account can be configured in one of the following levels of access:

- View Only
- View and allow Screen Change only
- Full Control

”Smart” facility managers incorporate continuous monitoring of critical systems throughout the building. Allowing operators, service providers or manufacturers to monitor, trouble-shoot and adjust control system from anywhere in the world allows for timely action on questionable operating conditions and improve system up-time. With Century Controls, you now have two-way web-based communication to your control panel which allows you to:

- Adjust system set points to match real-time loads (production scheduling, weather, etc.)
- Adjust lead/lag sequence
- Monitor alarm activity
- Monitor load swings and system performance

## FOR IMMEDIATE RELEASE

In addition to this direct Ethernet remote access capability, Century Controls also enables each solution to communicate to your Building Management System via common protocols (BACnet, Modbus, Lon Works and JCI Metasys Integrator). Our open communications platform allows Century to deliver unique flexibility and user-friendly solutions to facility managers.

In installations around the world, Century Controls' equipment is a proven way to reduce fuel costs, reduce emissions and extend equipment life. This complete line of boiler and air compressor controllers was designed by experts using proven, patented *smarter* algorithms that reduce energy bills -- taking energy savings straight to the bottom line. The algorithm makes the difference in the amount of money saved.
